PROFESSIONAL SUMMARY

Full-Stack Software Engineer with hands-on experience building and deploying enterprise-grade applications using the MEAN/MERN stack. Specialized in designing scalable architectures, multi-tenant systems, and data-intensive applications across manufacturing, finance, and HR domains. Proven ability to take products from concept to production, delivering high-performance, user-focused solutions.

TECHNICAL SKILLS

Frontend: Angular 17, React.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Angular Material, RxJS, Bootstrap
Backend and Database: Node.js, Express.js, REST API Development, MongoDB, Mongoose, MySQL, JWT Authentication
Architecture & Concepts: System Design, Multi-Tenant Architecture, Role-Based Access Control (RBAC), Database Design
Tools & Platforms: Git, GitHub, Docker, Postman, CI/CD, Render, Netlify, Vercel, VS Code, Figma

WORK EXPERIENCE

IDEAL TECH LABS – Software Engineer 1 (Jan 2026 – Present)

- Developed multi-tenant ERP, payroll, and HR features across Angular, Node.js, and MongoDB client/server codebases.
- Implemented project, task, and user reports with status filters, analytics controls, Excel exports, timesheet and rate-card views, and AG Insights screens.
- Enhanced payroll processing for dynamic salary components, employer costs, professional tax, arrears, leave/attendance inputs, and payroll adjustments; strengthened approval-aware TDS validation and payslip/report exports.
- Delivered Flutter timesheet and batch expense workflows with optional geolocation, multi-image receipts, Gemini OCR, and image compression; built visual template-editor canvas/property controls and isolated CSS with versioned assets.
- Resolved production issues across payroll, reporting, and ERP modules; refined API responses, dashboards, and export behavior.

IDEAL TECH LABS – **Full Stack Developer Intern** (Sep 2025 – Dec 2025)

● Contributed to the development of enterprise applications using the MEAN stack, gaining hands-on experience in scalable system design.
● Developed REST APIs and dynamic UI components using Angular and Tailwind CSS.
● Built core modules including user profile management and biometric attendance integration.
● Implemented data pipelines to process biometric hardware logs into structured attendance systems.
● Assisted in debugging, performance optimization, and deployment workflows.

FOUNDEVER – **Customer Service Professional** (Aug 2022 – Jan 2025)

● Provided international technical support for antivirus products (AVG & Avast), troubleshooting issues via Salesforce and Digital River platforms.
● Resolved technical and functional queries, improving customer satisfaction and retention.
● Strengthened problem-solving, multitasking, and communication skills, directly transferable to client-facing development roles.
● Documented technical processes and collaborated with teams for continuous service improvement.

PROFESSIONAL PROJECTS

Production Planning & Cash Flow System

- Built production planning and dispatch workflows with multi-line capacity scheduling, delivery estimates, and real-time utilization tracking.
- Connected invoicing and financial tracking with variance analysis across production revenue and cost streams.

Multi-Tenant Payroll & HR Management System

- Implemented payroll workflows for configurable salary components, employer-cost calculations, professional tax, statutory deductions, arrears, and payroll adjustments in a multi-tenant HR platform.
- Added leave and attendance inputs, approval-aware TDS declaration validation, and tax-processing safeguards; supported payslip generation and report exports.
- Worked across Angular, Node.js, and MongoDB application layers to fix payroll edge cases and keep employee, payroll, and reporting data aligned.

Accounting & Enterprise ERP System

- Developed ERP workflows for user profiles and biometric attendance across finance and HR modules.
- Built project, task, and user reports with status filtering, analytics controls, timesheet and rate-card reporting, and Excel export support.
- Connected REST-backed subscription and administrative controls with finance and HR workflows.

AG Timesheet & Expense Mobile App (Flutter)

- Built Flutter/Dart timesheet entry with optional geolocation and expense submission with multi-image receipt uploads and batch claims.
- Integrated Gemini OCR to extract receipt amount, date, and currency; compressed images before upload to reduce payload size.

AG Insights Reporting Add-on

- Implemented AG Insights client screens and server-side add-on support, with upgrade scripts and documentation for deployment.
- Added analytics and reporting controls across project, user, and task reports, including Excel export and configurable report views.

AG Visual Template Engine Studio

- Built a visual template editor with interactive canvas and property-inspector controls for configuring templates.
- Isolated editor CSS to prevent style leakage and added no-cache headers with static-asset versioning to prevent stale browser assets.

CERTIFICATIONS

Guvi - HTML, CSS & Tailwind, JavaScript, AdvancedJS, TypeScript, ReactJS, NodeJS, Database
Guvi - IIT-M Pravartak certified Full Stack Development Course with AI Tools

EDUCATION

Mohamed Sathak College Of Arts And Science - B.Sc. Computer Science | Grad - June 2022 | Chennai, Tamil Nadu
